**DISCLAIMER**

This office utilises a third party credit reference agency for credit assessment purposes. In submitting a request for this office to open a credit account, you are hereby providing us with your consent to carry out any credit reference searches that we deem necessary to support your application. These searches will be taken for credit information purposes only and may be carried out on both your company and its principals. The credit reference agency may also keep a record of our enquiry, and share that information with other businesses that may also make enquires about the company and its principals. This does not affect your statutory rights. You are also agreeing to abide by the Terms and Conditions of this office, in the absence of any written authority, strictly from this office, to the contrary. Our standard payment terms are 30 days from month end unless otherwise agreed in writing between both parties.

**I confirm I have read & accept the CPA Model Conditions for the Hiring of Plant (with effect from July 2011) as amended from time to time by ticking this box**

## TRAINING - OPERATOR TRAINING & FAMILARISATION: YOUR LEGAL OBLIGATIONS

It is the employer's responsibility to ensure that all operators using access equipment are adequately trained and familiarised to comply with current Health & Safety Legislation. Contact us on 01962 851155 for further details and costs.

### Training

Our IPAF and Health & Safety training courses include classroom theory, followed by a written test paper, together with practical sessions and assessment.

### Machine Familiarisation

Those who intend to use Mobile Elevating Working Platforms ("MEWP") with characteristics of weight, height, width, length or complexity which differ significantly to the training they have received should ensure that they receive a familiarisation to cover the differences. Machine specific familiarisation should follow on from basic training and cover: manufacturer's instructions and warnings, features of the specific model, control functions, safety devices and emergency lowering procedures. All of the above are to be found in the information supplied with the machine.

## SAFETY HARNESES

IPAF strongly recommends that a full body harness with adjustable lanyard (used to provide work restraint and adjusted to be as short as possible) is used when working from a boom type MEWP.

Contact your local depot for details and costs.
